

25-0-0

Extended Release Nitrogen

Product Description

- 25-0-0 ERN is a concentrated liquid fertilizer used to supplement foliar and soil based programs
- Sea plant extract is added for improved Stress Tolerance, Root Development and Nutrient Uptake
- Urea triazone extends nitrogen utilization and allows nutrients to remain soluble on the leaf surface for longer periods.

Guaranteed Minimum

Total Nitrogen (N) 25.0%
8.0%..... Ammoniacal Nitrogen
8.0%..... Nitrate Nitrogen
9.0%..... Water Soluble Nitrogen

Non-Plant Food Ingredients
N-(n-Butyl)-thiophosphoric triamide1.0%
Sea plant extract.....10.0%

Derived from: Ammonium nitrate, urea, urea-triazone and 4% Seaplant extract

How 25-0-0 ERN Works

25-0-0 ERN utilizes a urease inhibitor that delays the conversion from Ammoniacal to nitrate nitrogen. This allows the product to remain in a stable form for a longer period of time, therefore extending the time that the plant can utilize it.

The addition of sea plant extract provides the plant with naturally occurring hormones specific to root development providing increased root mass and density.

This combination provides sequenced release plant nutrition and keeps plants healthier, reducing stress and improving overall plant health.

Key Product Benefits

- Sequenced Plant Nutrition
- Key Plant Hormones
- Improved Stress Tolerance
- Improved Nutrient Uptake
- Reduced Volitization and Leaching
- Longer Lasting Color and Nutrition
