

Liqui-Man

Foliar Liquid Manganese

Product Description

- **LIQUI-MAN** is a liquid foliar formulation. Designed for maximum uptake of manganese. Since both leaves and woody tissue easily absorb **LIQUI-MAN**, it is very effective as a foliar spray.
- **LIQUI-MAN** prevents and corrects deficiencies in turf, fruit and most other crops. If added to a spray tank it will aid in lowering water pH. The addition of a non-ionic surfactant will aid in uptake.

Guaranteed Minimum Analysis

Total Manganese (Mn)	8%
Water Soluble Manganese	8%
Sulfur (S)	5%

Derived From: Manganese Sulfate and
Ammonium Citrate

Directions for Use

LIQUI-MAN should be applied as needed starting with the first spray at 1 to 2 gallons per acre in 40 to 50 gallons of water. Actual manganese requirements should be determined by a soil and tissue test.

Application Instructions

Apply 6 oz. per 1000 sq. ft. of turf in 2.5 gallons of water, or 2 gallons per acre diluted in 50 gallons of water. This product should be used as a supplement to a regular fertility program. It will not by itself provide all the nutrients normally required by plants.

Precautions

- Do not use with liquid foliar or ground fertilizer containing phosphates.
- When compatibilities are unknown or questionable contact your supplier or use a jar compatibility test.
- The final tank mix should not be below 5 pH.

Antidotes

Skin or eye contact: Flush thoroughly with water and see a physician. Internal: Induce vomiting if conscious and get medical attention at once.
