This combination of bioactive materials increases nutrient absorption, resulting in maximum plant nutrition utilizing low dose applications. **Zeta x plex L-18™** *increases nutrient uptake, nutrient transport and improves the ability of the plant to combat environmental stress.*

1-0-15 is a high performance foliar fertilizer that provides excellent turf health by offering the following advantages:

- L-Amino Acids that are easily absorbed by plants enhancing uptake of nutrients and tank mix products.
- Improves the plants ability to create necessary proteins and protein structures.
- Utilization of L-Amino Acids allows the plant to conserve energy and strengthen root systems.
- Provides organic molecules that increase chlorophyll and photosynthesis.
- K helps build leaf strength and helps the plant maintain proper osmotic relations.
- Micronutrients enhance plant color and help build proper enzymes.
